

# VELESA LYON

## EXPORT / IMPORT TRADING

### **RAPSEED MEAL**

Rapeseed meal, called canola meal in North America, Australia and some other countries, is the by-product of the extraction from the oil.

It is a protein rich ingredient that is widely used to feed all classes of the livestock. Worldwide production of rapeseed meal is second only to soybean meal.

## SPECIFICATION OF RAPSEED MEAL

|                   |      |
|-------------------|------|
|                   |      |
| moisture %        | 9    |
| crude protein %   | 38   |
| crude oil %       | 3.8  |
| crude cellulose % | 11.1 |
| crude ash %       | 7.2  |

## RAPESEED SEED CULTIVATION AREA IN TURKEY / HARVESTED AREA IN TURKEY

| YEARS | CULTIVATION AREA    | HARVEST AREA        |
|-------|---------------------|---------------------|
| 2013  | 311 thousand decare | 311 thousand decare |
| 2014  | 321 thousand decare | 321 thousand decare |
| 2015  | 351 thousand decare | 351 thousand decare |
| 2016  | 355 thousand decare | 355 thousand decare |
| 2017  | 165 thousand decare | 165 thousand decare |
| 2018  | 378 thousand decare | 378 thousand decare |

### PRODUCE AMOUNT

|      |                    |
|------|--------------------|
| 2013 | 102 thousand tones |
| 2014 | 110 thousand tones |
| 2015 | 120 thousand tones |
| 2016 | 125 thousand tones |
| 2017 | 60 thousand tones  |
| 2018 | 125 thousand tones |

### YIELD

|      |               |
|------|---------------|
| 2013 | 328 kg/decare |
| 2014 | 342 kg/decare |
| 2015 | 344 kg/decare |
| 2016 | 353 kg/decare |
| 2017 | 364 kg/decare |
| 2018 | 330 kg/decare |
